SCHOOL MANAGEMENT SOFTWARE

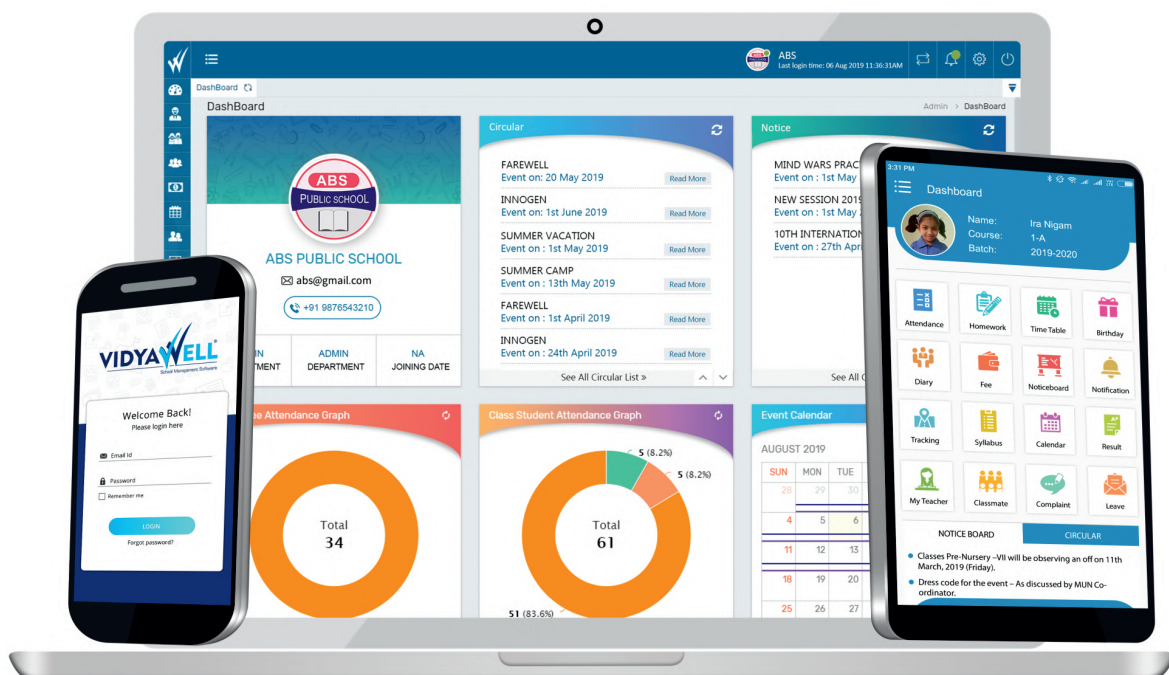

All is Well with VidyaWell

There is revolution in the air, even as India moves towards the digital space. This has led to cutting-edge solutions in the education sphere, with online tracking of schools and colleges. Every stakeholder in the institutional set up, the teachers, students, parents and management form a part of this connected world. Up till now, schools have had to manage various departments manually.

The VidyaWell school management software has been developed by BSN Infotech Private Limited. BSN Infotech is an IT services and staffing solutions company established in the year 2003. The company, ever since its inception, has been serving many renowned government organizations and private business bodies with top-notch services such as website and software development, digital marketing, project outsourcing, and consultancy services.

We, at BSN Infotech, have been aware of the gaps that exists in the present system and after many brainstorming sessions with school managements, we have put in place a robust and flexible software that is geared to meet all aspects of school & colleges management. This will ensure flexibility and ease of use. VidyaWell is a comprehensive software and app-based platform that promises to change the way schools & colleges are run.

With information technology tools allowing access & transparency, it is important that we adopt technologies that help ensure automated data management of educational institutions. Once our software finds acceptance, we aim to ensure a smooth change-over to providing paperless solutions. VidyaWell ensures online management of each and every activity like school admissions, online attendance, curriculum management and vehicle tracking of students to name a few. Imagine, that your student can now submit his/her assignments online and can even get academic updates as and when the need arises.

The— VidyaWell Highlights

You Teach WE ENSURE QUALITY

1 Syllabus Delivery System

Interactive module for sharing class wise syllabus & syllabus coverage status.

2 Child Security

Your child is in a secure & digitally monitored environment and we can find the 'child's last seen' location from a centralized system, thereby ensuring the security of the child.

3 GPS Tracking & Geo-fencing

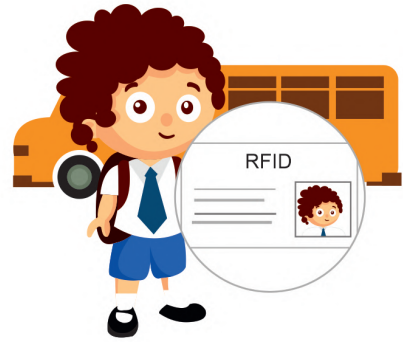

Track location and set pre-defined boundaries for your child's movements. Through Geo-fencing you can protect your child from danger zones.

4 Online Fee Payment

Parents can pay their ward's fee online through mobile app and portal.

Smart Attendance

Smart attendance of students through RFID cards and of school staff through RFID, biometric and barcode.

Digital Diary

Online diary for sharing homework, assignments, PTM, field trip details, etc.

Live Timetable

Get daily updated timetable and teacher substitution without worries.

Ensure Data Privacy

Highly secure, encrypted data at server end with automatic data backup facility.

Analytical MIS Reports

Assess your school's growth through trend analysis where more than 100 MIS reports are available in finance, procurement, purchase, stock, library, and other modules.

Notification, News & Circular

Send notifications about daily student attendance, homework, PTM, and other activities. Parents and staff will be notified about all school-related news and circulars on their Vidyawell account.

Complaint Redressal/Student Query

Transparent feedback and complaint redressal mechanism between parents and teachers and through Student Query Window both students and teachers can connect.

Exam and Result Management

Get your ward's tests, activities and terminal exam result online and easily view and download admit card and report card.

Digital Visitor Management

Online visitor's appointment, booking and scheduling. Complete tracking of visitors' in school premises.

Dual Accessibility

Compatible for both computers and smartphones/tabs.
